Professional Summary

Infrastructure & DevOps Engineer with 1.5+ years of professional experience spanning network administration, IT infrastructure, and full-stack development. Hands-on with Docker containerization, CI/CD pipelines (GitHub Actions), cloud deployments on AWS (EC2, ECR, ECS, ASG), and production monitoring with Prometheus, Grafana, and New Relic. Experienced in managing production Linux servers, Nginx reverse proxy configuration, and network infrastructure at a high-security government facility. Proven ability to containerize applications, build automated deployment pipelines, and implement observability stacks from scratch. Seeking DevOps/SRE roles to drive infrastructure automation and reliability at scale.

Technical Skills

- **DevOps & Cloud:** Docker (Multi-stage Builds, Compose, Volumes, Networking), GitHub Actions (CI/CD), AWS (EC2, ECR, ECS, S3, Auto Scaling Groups), Nginx (Reverse Proxy, SSL/TLS), Cloudflare, Vercel
- **Monitoring & Observability:** Prometheus, Grafana (Dashboard Provisioning, Alerting), New Relic, prom-client, Custom Metrics Instrumentation
- **Operating Systems:** Linux (Ubuntu, CentOS, Kali Linux), Windows Server
- **Networking:** TCP/IP, DNS, DHCP, Firewalls, VPN, Subnetting, SSH, Load Balancing, Network Troubleshooting
- **Scripting & Programming:** Bash/Shell Scripting, Python (Automation), JavaScript, TypeScript
- **Version Control:** Git, GitHub (Branching, PRs, Merge, Revert, CI/CD Workflows)
- **Web Technologies:** React.js, Next.js, Node.js, Express.js, RESTful APIs, HTML5, CSS3
- **Databases:** PostgreSQL, MongoDB, Prisma ORM, SQL
- **Security:** Wireshark, Nmap, SIEM Basics (Splunk/ELK), SSL/TLS, API Key Auth, Rate Limiting, CORS Hardening
- **Currently Learning:** Kubernetes, Terraform, Ansible, Jenkins

Professional Experience

CSK Infotech

Dec 2025 – Feb 2026

Network Administrator — Client: India Government Mint, Hyderabad

Hyderabad, India

- Managed and maintained network infrastructure for a government facility, ensuring 99%+ uptime of critical systems
- Administered Linux and Windows servers, performing system monitoring, patch management, and security hardening
- Configured and troubleshooted network devices including switches, routers, firewalls, and VPN connections
- Implemented network monitoring and maintained logs for incident tracking and resolution
- Managed DNS, DHCP, and TCP/IP configurations across the network environment
- Documented network topology, standard operating procedures, and troubleshooting guides

Keypoint Technologies

Aug 2025 – Dec 2025

IT Infrastructure Support — Client: India Government Mint, Hyderabad

Hyderabad, India

- Provided IT infrastructure support and system administration at a high-security government facility
- Managed server deployments and maintained production environments for critical applications
- Performed routine system health checks and backup verification
- Assisted in implementing security policies and access control measures for sensitive systems
- Coordinated with cross-functional teams for system upgrades and infrastructure improvements

MDP Infra (India) Pvt. Ltd.

Oct 2023 – Jan 2024

Frontend Developer Intern

Bhopal, India

- Redesigned MDP-attendance system, improving user experience by 40% and reducing page load time by 25%
- Built and deployed interactive data visualization dashboards with 5+ analytical components
- Collaborated with cross-functional team to integrate frontend with backend APIs using RESTful architecture
- Applied CI/CD practices using GitHub for version control and automated deployment workflows

DevOps & Infrastructure Projects

KistCompare — (Fintech App)Production Monitoring & Container Orchestration

kistcompare.in

- Containerized a full-stack fintech application (React + Node.js/Express + PostgreSQL) using Docker multi-stage builds, reducing image size by 60% and standardizing deployments across environments
- Architected a complete observability stack with Prometheus metrics instrumentation (prom-client), custom HTTP request counters/histograms, and pre-provisioned Grafana dashboards (8 panels: request rate, p95/p99 latency, error rate, memory, CPU, event loop lag)
- Designed Docker Compose orchestration for 3-service stack (app, Prometheus, Grafana) with persistent host volumes, health checks, and automated service dependency management
- Built end-to-end CI/CD pipeline using GitHub Actions with SSH-based deployment to AWS EC2, automating git pull, container rebuild, and zero-downtime restarts
- Implemented production security hardening: API rate limiting (100 req/15min), CORS origin locking, API key authentication, and direct browser access blocking

Linux Server Automation Scripts

[GitHub](#)

- Developed Bash scripts for automated server setup, including package installation, user management, and service configuration
- Created cron-based monitoring scripts for disk usage, process management, and log rotation
- Implemented SSH key-based authentication and server hardening scripts following security best practices

Real-Time Collaborative Platform (Syncro Code)

[GitHub](#) | [Live Demo](#)

- Built and deployed a real-time collaborative coding platform using Node.js and WebRTC
- Deployed on cloud infrastructure with Vercel and configured custom domain with Cloudflare DNS
- Implemented secure authentication and access control mechanisms

Video Conferencing App (MEETHUB)

[GitHub](#) | [Live Demo](#)

- Developed and deployed a full-featured video meeting application with real-time communication
- Managed cloud deployments, DNS configuration, and SSL certificate setup
- Optimized application performance for handling concurrent users and sessions

Education

Technocrats Institute of Technology and Science

Bhopal, MP

BTech in Computer Science Engineering

2023

- CGPA: 8.02/10
- Relevant Coursework: Data Structures, DBMS, Software Engineering, OOP, Computer Networks, Operating Systems

Certifications & Continuous Learning

- DevOps Engineering Roadmap — Self-paced (Kubernetes, Terraform) — *In Progress*
- Full Stack Development — *Completed*
- Actively contributing to open-source projects and publishing technical content
